Udaya Krishantha Nanayakkara

Senior Full-Stack Web Developer | WordPress & WooCommerce | PHP & Laravel | React & Next.js

New Zealand | krishannanayakkara@gmail.com | +64 27 231 3507 | github.com/krishan-web-dev

PROFESSIONAL PROFILE

Senior Full-Stack Web Developer with 12+ years of hands-on experience building, improving and supporting production websites, eCommerce platforms and web applications for international clients. Strong across PHP, WordPress, WooCommerce and Laravel, with modern JavaScript/TypeScript development using React and Next.js. Comfortable owning the full development lifecycle - from wireframes, Figma hand-off and responsive UI through API development, databases, testing, deployment, hosting, performance optimisation and technical SEO. Particularly effective when a project needs someone who can understand the business requirement, trace the technical problem and carry a practical solution through to production.

CORE TECHNICAL SKILLS

Programming & Software Development: PHP Programming, JavaScript Programming, TypeScript, HTML5, CSS3, SQL, Software development, Web applications, API development

Frameworks & Front End: Laravel Framework, React.js, Next.js, Tailwind CSS, Bootstrap, Webpack, Responsive design, mobile-first development

CMS & eCommerce: WordPress CMS, WooCommerce, Drupal, Shopify, Content Management Systems, custom themes, custom plugins, headless WordPress, Magento CMS (familiarity), eCommerce

APIs & Databases: REST APIs, GraphQL, API integration, MySQL, PostgreSQL, Database systems, SQL query language, Payment gateways, third-party integrations

UI, UX & Design: UI, UX, Web design, Wireframing, Figma, Responsive design, accessibility, cross-browser implementation

SEO & Analytics: Search Engine Optimisation (SEO), technical SEO, search engines, keyword research, Google Analytics, Core Web Vitals, website optimisation

DevOps & Support: Git, GitHub, version control, Git version control system, Linux, hosting, systems administration, VPS, cPanel/WHM, Plesk, Vercel, DNS, SSL, debugging, troubleshooting, migrations, backups

AI-Assisted Development: AI tools and AI applications for code exploration, debugging, test support and documentation, with developer review before production use

PROFESSIONAL EXPERIENCE

Senior Web Developer / Full-Stack Web Developer

Honu Web Design, Hawaii, USA | Freelance / Remote | Apr 2014 - Present

- Deliver and support custom websites, eCommerce stores and web applications for international clients, taking projects from requirements and technical planning through development, launch and ongoing maintenance.
- Build custom WordPress themes, plugins, reusable components and WooCommerce functionality; also work with Shopify when the project requires a hosted eCommerce platform.
- Develop and integrate REST APIs, GraphQL services, payment gateways, booking systems and other third-party platforms, including data mapping, error handling and front-end integration.
- Turn Figma, Photoshop, wireframes and visual design concepts into responsive, accessible, cross-browser interfaces using HTML, CSS, JavaScript and modern front-end practices.
- Diagnose and resolve PHP, JavaScript, database, hosting and configuration issues; manage migrations, domains, DNS, SSL, VPS/cPanel environments, backups and production deployments.
- Improve page speed, Core Web Vitals, technical SEO, mobile usability and conversion-critical user journeys while preserving existing content and business functionality.
- Work directly with clients to clarify requirements, estimate work, explain technical trade-offs and keep multiple concurrent projects moving without unnecessary complexity.

Senior UI Designer & Full-Stack Web Developer

Champsoft Pvt Ltd | Jan 2023 - May 2024

- Designed and developed secure, responsive websites and web applications using WordPress, PHP, JavaScript and MySQL, combining UI/UX work with production development.
- Created wireframes, layouts and visual concepts, then translated approved designs into polished interfaces with strong responsive behaviour and usability across devices.
- Developed and customised WordPress themes and plugins, built reusable front-end components and integrated third-party APIs and services.
- Improved performance, SEO, security and maintainability through front-end optimisation, code review, debugging and configuration changes.
- Worked on projects subject to HIPAA and SOC 2 security and privacy requirements, applying secure development practices when handling sensitive information.
- Collaborated with developers, clients and project stakeholders and provided practical technical guidance to junior team members when needed.

Full-Stack Web Developer - Contract

Digital Art Solutions Pvt Ltd | Mar 2022 - Sep 2022

- Built high-end, fully customised websites for Australian clients, translating creative concepts and business requirements into production-ready web experiences.
- Developed responsive front-end interfaces and custom back-end functionality using modern web technologies, content management systems and database-driven features.
- Integrated REST APIs and third-party services, performed functional and cross-browser testing, and resolved issues found during QA and launch preparation.
- Worked closely with designers, developers and project managers to deliver websites aligned with client branding, usability expectations, performance and security requirements.

SELECTED PROJECTS & TECHNICAL WORK

Headless Corporate & Product Catalogue Platform - Next.js / WordPress / WooCommerce

Built a headless web platform using Next.js, TypeScript, Tailwind CSS, WordPress, WooCommerce, ACF and WPGraphQL. Implemented dynamic product and category experiences, GraphQL data fetching, responsive components, SEO metadata, structured data, caching strategies and Vercel deployment workflows. The work combines modern React development with a WordPress content management and eCommerce back end.

Custom WordPress Development

Selected projects include Attentive, Rugby Fives, Allergy 250K Teens and ClotIQ, covering custom theme development, responsive UI implementation, content management, integrations, debugging and ongoing optimisation.

eCommerce & Business Websites

Selected work includes Enjoy the Maui Life, Vibes of Aloha and Goliath Outdoor, with WordPress/WooCommerce development, eCommerce functionality, third-party integrations, hosting support and performance-focused maintenance.
